Germany's SAARLAND | invest trade service

# gwSaar Saarland Economic Promotion Corporation

## MEDICA 2026

Under the brand Germany's Saarland, Saarland's official economic development agency is your reliable partner for investment projects in Saarland and for expanding your business internationally. With long-standing expertise, strong networks with decision makers in politics and business, and close cooperation with service providers and partners, we ensure efficient and cost-effective implementation of settlement projects across a wide range of industries.

From the initial site search to building your customized property and supporting recruitment during operations, our experienced team develops tailor-made solutions for even the most complex projects.

To maximize Saarland's location potential, we use advanced digital tools to identify content and evaluate unused properties and land ("brownfields"). A comprehensive, state-wide brownfield register helps us quickly provide the perfect match for your future business location.

Through our global partner network, we ensure seamless communication across distances, time zones, and language barriers. We also support Saarland-based companies in exploring international markets, connecting them with our worldwide network, and organizing trade fairs and business delegations.

If you want to invest, expand, or find partners in business and research – gwSaar is your key contact.

# intra special catheters

## MEDICA 2026

The company was founded in 1977. Since then, we have provided our customers worldwide with special catheters for anaesthesiology and departments of internal medicine, intensive care and emergency medical care, cardiology and pulmonology. With a maximum of realized safety and primarily a consistent high quality, we offer users several advantages through our products.

The quality and success of a product are defined more than ever by high and consistent quality. Therefore, we rely on skilled employees and modern, certified production. Of course, all our products are manufactured and sterilized under GMP. Therefore, only materials of the highest purity and quality are used.

Through our years of experience, we can meet the new challenges posed by rapid technological developments. No product is so good that it cannot be further improved. Therefore, innovation is our daily business in collaboration with doctors from the research, universities and hospitals.

**intra** products are used in various fields of medicine; both in pulmonology, where special catheters are used to remove pathological accumulations of air and/or fluid within the pleural cavity, and in intensive care as well as cardiology for invasive measurement of arterial/venous or pulmonary pressures.

Of course, we offer adequate accessories for all our special products.

Essential distributors, suppliers and partners of the enterprise from all over the world are expected in Düsseldorf to discuss future expectations and developments.

# Medicoplast International GmbH

## MEDICA 2026

Development, production, and sterilization of high-quality, innovative medical products **Made in Germany**

From the initial idea to the final product, we support our customers with comprehensive expertise in product development and approval documentation.

Our ISO Class 8 clean room allows for a variety of production techniques, including injection molding, extrusion, machine manufacturing, manual work, and sterile packaging.

Our portfolio also includes ethylene oxide sterilization. We operate two modern vacuum sterilization chambers and offer our customers individual consultation, sterilization cycles specially adapted to the respective product, and support in meeting regulatory requirements.

For over 50 years, we have stood for innovation, precision, and quality in medical technology **Made in Germany**

With our extensive knowledge and high level of expertise in development and production, as well as ethylene oxide sterilization for complex, high-quality products, we are your comprehensive partner.

# MEDTRON AG

## MEDICA 2026

For more than 30 years, MEDTRON has been developing contrast media injectors and disposables for medical imaging. Our goal is to support clinical workflows with reliable, user-friendly solutions while continuously advancing the safe and precise administration of contrast media. In doing so, we combine extensive medical technology expertise with innovation "Made in Germany" and a strong international partner network.

MEDTRON's portfolio includes contrast media injectors for CT, MRI, and angiography, along with compatible disposables. Product development, manufacturing, service, and application expertise are closely integrated to deliver solutions designed around real-life clinical workflows. With Syriflow® MR, we are expanding our portfolio for the first time to include a mr conditional infusion pump for the continuous administration of medication in the MRI environment. Developed for use in radiology, anesthesiology, intensive care, and pediatrics, Syriflow® MR complements our existing portfolio while creating opportunities to reach new clinical fields and markets.

To support the international market development of Syriflow® MR, MEDTRON is looking for experienced distribution and sales partners who want to grow new markets together with us. As an independent medical technology specialist, we offer the advantages of focused expertise, agile decision-making, personalized support, and close collaboration with our partners. Backed by more than 30 years of experience and an international network spanning more than 100 countries, MEDTRON provides a strong foundation for long-term partnerships in medical imaging and beyond. We invite distributors and commercial partners to connect with us and explore opportunities to introduce Syriflow® MR in their markets.

# MT Promedt Consulting GmbH

## MEDICA 2026

Medical technology is a strictly regulated industry with a multitude of rules and certification requirements. Since 1995, MT Promedt Consulting GmbH, based in St. Ingbert, has been supporting medical device and IVD manufacturers with CE certification and international registrations. The goal is to provide comprehensive consulting services to comply with the complex requirements of medical device regulations and thus enable rapid and cost-efficient access to international markets.

Our complete CE certification service ranges from product-related regulatory strategy to the preparation of all documentation required to demonstrate compliance with European regulations.

The company provides support in setting up modern, company-specific quality management systems in accordance with EN ISO 13485:2016 and accompanies the corresponding audits.

In addition, we offer support with international product registrations, e.g., in the USA, Japan, South Korea, Australia, Saudi Arabia, Singapore, Taiwan, and others.

EN ISO 13485:2016 certified, MT Promedt Consulting GmbH also acts as a European Authorized Representative for non-European manufacturers and supports them in obtaining approval within the EU.

Since January 1, 2021, we are also offering services as a Responsible Person in the United Kingdom (UKRP) through our subsidiary MT Promedt Consulting Ltd, based in Oxford.

Collaborating with MT Promedt Consulting GmbH offers valuable support for CE certification and international approvals of medical devices. With our 30 years of experience, certified quality, and a strong global network, the company provides fast, secure, and cost-efficient market access.

# Polycine GmbH

## MEDICA 2026

Once again this year, Polycine GmbH will be exhibiting at MEDICA in Düsseldorf. The trade fair provides a great opportunity to meet existing contacts, connect with new people, and present our solutions for the packaging of liquid pharmaceutical products.

For more than 20 years, Polycine has been developing and manufacturing PVC-free multilayer films and tubing systems in Saarland, Germany, for a wide range of pharmaceutical and medical applications. These include solutions for standard IV and IV specialty applications, parenteral nutrition, dialysis, overwrap, and veterinary applications.

What matters most to us is reliable quality, practical solutions, and close cooperation with our customers. Different products and applications come with different requirements, which is why we work closely with our customers to find the right solution for their specific needs.

Behind Polycine is an experienced team with expertise across different fields and a wide range of backgrounds. This combination of experience, technical know-how, and different perspectives shapes the way we work every day.

For us, MEDICA is above all a place for personal exchange. We look forward to seeing familiar faces, making new connections, and discussing current topics, challenges, and future projects. We look forward to meeting you!

# Re:invent Health Care UG

## MEDICA 2026

Re:invent Health Care UG was founded in Germany with a clear idea: diagnostics should be closer to people and their real healthcare needs.

Our story builds on long-standing experience in the IVD industry and our role as JD Biotech's dedicated European partner.

As JD Biotech's dedicated partner for the European market, we combine long-standing experience in IVD development and manufacturing with a direct understanding of the European market. Our goal: to make diagnostics more accessible.

Our focus is intimate and reproductive health. Our portfolio ranges from rapid tests for professional use to self-tests and multi-target testing solutions.

From our base in Germany, we continue to develop our offering for the European market, guided by real healthcare needs and different stages of life.

We are looking to build long-term relationships with distributors, healthcare partners, diagnostic companies and development partners across Europe.

As a Germany-based partner, Reinvent Health Care UG combines local market understanding with JD Biotech's experience in IVD development and manufacturing.

Whether you are interested in diagnostic products, distribution, market cooperation or future development projects, we look forward to exploring opportunities together.

# WELLGO Systems Becomes MOVENTIQ

## MEDICA 2026

WELLGO Systems will operate under the name MOVENTIQ going forward and will unveil its new corporate identity for the first time at MEDICA 2026. Under its new name, the company will continue to develop technology-neutral, customized electric drive solutions for medical and rehabilitation technology – from the initial concept through to production readiness.

The intelligent integration of motors, sensors, electronics, software, and AI results in highly functional complete systems that combine intuitive operation, safety, control, and precision. At MEDICA, MOVENTIQ is seeking to engage with manufacturers and development partners who wish to further develop their products using innovative drive technology.

### Smart Drive Solutions for Medicine and Rehabilitation

Whether it's moving heavy loads with minimal effort, smart wheels that detect the operator's intended movement, or special safety features that make everyday life more comfortable: MOVENTIQ develops tailored drive systems even for demanding and unusual applications. Customers can get started with just an initial product idea or a specific technical challenge. The interdisciplinary team provides support with feasibility studies, technology selection, development, testing, and transition to series production. The portfolio includes torque motors, external-rotor and internal-rotor motors, and linear actuators. Using the "motor-as-sensor" approach, these motor designs can be expanded into intelligent drive systems. In addition, MOVENTIQ develops intuitive input devices, electronics, and software, as well as custom test equipment and test benches.

### MOVENTIQ at MEDICA 2026

At MEDICA 2026, MOVENTIQ will demonstrate how engineering expertise, collaborative partnerships, and a consistent focus on quality result in market-ready drive solutions. Interested companies are invited to discuss their applications and potential joint development projects in person.
